Sequence 35, Application US/09071433A

GENERAL INFORMATION:

APPLICANT: Bennett, C. Frank

TITLE OF INVENTION: Antisense Modulation of CD40 Expression

FILE REFERENCE: RTS-0002

CURRENT APPLICATION UNMER: US/09/071,433A

CURRENT FILE OF INVENTION DESC.01

NUMBER OF SEQ ID NOS: 91

SOFTWARE: PatentIn Ver. 2.0

Sequence 60, Application US/08985162

Patent No. 6057156

GENERAL INFORMATION:

APPLICANT: Akntar, Saghir

TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT

TITLE OF INVENTION: PACTOR RECEPTORS

NUMBER OF SEQUENCES: 1877

CORRESPONDENCE ADDRESS:

ADDRESSEE: Lyon & Lyon

STREET: Suite 4700

CITY: Los Angeles

STATE: California

COMPUTER: Enalabale FORM:

MEDIUM TYPE: 3.5" Diskette, 1.44 Mb

MEDIUM TYPE: 3.5" Diskette, 1.44 Mb

MEDIUM TYPE: STORMS

COMPUTER: IBM Compatible

COMPUTER: BASTERD

SOFTWARE: FASSERG FOR Windows 2.0

CURRENT APPLICATION DATA:

FILING DATE: 04 December 1997

CLASSIFICATION: 514
                                                                                                                                                                                                                                                      1; Indels

US-09-021-701-41

Sequence 41, Application US/09021701

Patent No. 621588

GENERAL INFORMATION:
APPLICANT: Shannon, Karen W.
APPLICANT: Shannon, Robber Peter G.
APPLICANT: Webb, Peter G.
APPLICANT: Kincaid, Robert H.
TITLE OF INVENTION: Methods for evaluating oligonucleotide
TITLE OF INVENTION: probe sequences
NUMBER OF SEQUENCES:
NUMBER OF SEQUENCES:
ADDRESSEE: Records Manager, Legal Department, Hewlett-Packard Company M/S 20
STREET: 3000 Hanover Street
CITY: Palo Alto

US-09-371-772B-3770/C

Sequence 3770, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: McSwiggen, Jim

APPLICANT: Bacobedo, Jaime

APPLICANT: Stinchcomb, Dan

APPLICANT: Stinchcomb, Dan

APPLICANT: Bacobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

FILE REPERENCE: MBHB00, 876-J (237/198)

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SEQ ID NO 3770

LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         KESULT 225

Faguence 27, Application US/08924870A

Patent No: 6143491

GENERAL INFORMATION:
TITLE OF INVENTION: THERAPEUTIC COMPOSITIONS AND METHODS AND TITLE OF INVENTION: DIAGNOSTIC ASSAYS FOR TYPE II DIABETES INVOLVING HNF-1 TITLE OF INVENTION: DIAGNOSTIC ASSAYS FOR TYPE II DIABETES INVOLVING HNF-1 NUMBER OF SEQUENCES: 28
CORRESPONDENCE ADDRESS:
ADDRESSE: FOLEY, HOAG & ELIOT LLP
STREET: One Post Office Square
CITY: Boston

2 Patent No. 6440726

GENERAL INFORMATION:
APPLICANT: RESNICK, NITZAN

TITLE OF INVENTION: EXPRESSION VECTORS COMPRISING MULTIPLE SHEAR STRESS
TITLE OF INVENTION: TREATING DISORDERS RELATED TO VASCULOGENESIS AND METHODS OF USE FOR
TITLE OF INVENTION: ANGIOGENESIS IN A SHEAR STRESS ENVIRONMENT
FILE REPREMENCE: P-2771-US

CURRENT PILLING DATE: 1998-12-24

NUMBER OF SEQ ID NOS: 6

SOFTWARE: Patentin Ver. 2.1

Parent No. 6566127

GENERAL INFORMATION:
APPLICANT: Bacoboo, Jame
APPLICANT: Bacoboo, Jame
APPLICANT: Bacoboo, Jame
APPLICANT: Stinchcomb, Dan
APPLICANT: Scobedo, Jame
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: NUMBER: US/09/371,772B
CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR FILING DATE: 1995-10-26
PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR APPLICATION NUMBER: US 60/005,974
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 265
US-09-371-772B-5457

Sequence 5457, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Biocyme Pharmaceuticals, Inc.
APPLICANT: Birinchomb, Dam.
APPLICANT: Brochedo, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
FILE REPERENCE: BIRBHOO, 376-J (237/198)
CURRENT APPLICATION NUMBER: US/09/371,72B

CURRENT FILING DATE: 1995-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFFWARE: PatentIn version 3.0

                Sequence 467, Application US/09827998

Sequence 467, Application US/09827998

Patent No. 6656700

GENERAL INPORMATION:
APPLICANT: Shannon, Mark
TITLE OF INVENTION: NOVEL ISOFORMS OF HUMAN PREGNANCY-ASSOCIATED PROTEIN E
FILE REFERENCE: MDHAORE: US/09/827,998

CURRENT APPLICATION NUMBER: US/09/827,998

CURRENT APPLICATION NUMBER: US 60/236,359

PRIOR APPLICATION NUMBER: US 60/236,359

PRIOR FILING DATE: 2000-09-26

PRIOR FILING DATE: 2000-09-27

NUMBER: OF SEQ ID NOS: 1881

SOFTWARE: Aeomica Sequence Listing Engine

SEQ ID NO 467

LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                APPLICANT: U. Sequence 46, Application US/09371772B

Sequence 46, Application US/09371772B

Pacent No. 6556127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Bacobed, Jaim

APPLICANT: Stinchcoup, Dan

APPLICANT: Stinchcoup, Dan

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions

TITLE OF INVENTION: Levels of Vacular Endothelial Growth Factor Receptor

FILE REFERENCE: MHHBO, 876-J (237/198)

CURRENT APPLICATION NUMBER: US (09/03/11, 772B

CURRENT FILING DATE: 1999-10-26

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0

SEQ ID NO 46

Sequence 245, Application US/09081646

| Sequence 245, Application US/09081646
| Patent No. 6333152
| GENERAL INFORMATION:
| APPLICANT: KAINZIEN, Kenneth
| APPLICANT: Zhou, Weil
| TITLE OF INVENTION: Gene Expression Profiles in No. 6333152mal and
| TITLE OF INVENTION: Cannear Cells
| TITLE OF INVENTION: Cannear Cells
| FILE REFERENCE: 01107.74664
| CURRENT PILION DATE: 1998-05-20
| EARLIER APPLICATION NUMBER: 05/09/081,646
| CURRENT PILION DATE: 1998-05-20
| EARLIER PILION DATE: 1998-05-21
| NUMBER OF SEQ ID NOS: 871
| SOFTWARE: FastSEQ for Windows Version 3.0
| SEQ ID NO 245
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   .

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 339

(3-09-479-005A-303

(3-09-479-005A-303

Patent No. 6656731

GENERAL INPORMATION:

TITLE OF INVENTION: Nucleic Acid Catalysts with Endonuclease Activity

TITLE OF INVENTION: Nucleic Acid Catalysts with Endonuclease Activity

FILE REPERENCE: MHHH00-884-C

CURRENT APPLICATION NUMBER: US/09/479,005A

CURRENT FILING DATE: 2000-01-07

PRIOR FILING DATE: 1999-11-19

PRIOR FILING DATE: 1999-11-19

PRIOR APPLICATION NUMBER: US 09/444,209
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ; FEATURE: ; OTHER INFORMATION: Description of Artificial Sequence: PCR PRIMER 108-059-050-159-9
